COMPLETE RANGE OF OPTIONS AS STANDARD

DISCOVER OUR ...

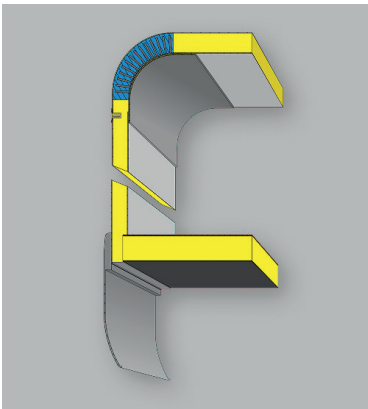

GRP ROOF COATING

Hail-resistant roof with curved edges, ensuring the highest level of insulation and watertightness (each vehicle comes with a 10-years warranty for this feature).

INSULATION AND SOUNDPROOFING

Masuria developed own wall production technology based on PUR foam and GRP laminate. The internal structure is characterized by a very high insulation and soundproofing coefficient, significantly higher than that of commonly used EPS and XPS. 1 cm of wall in PUR technology corresponds to 1.8 cm of EPS (Styrofoam) coating.

10-YEARS WARRANTY

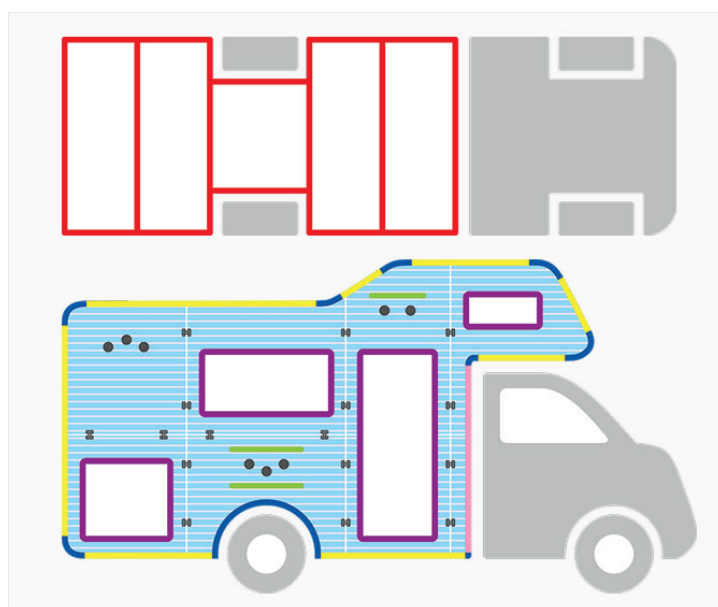

TECHNOLOGY

Provided by engineers and designers with many years of experience, advanced technology, and the highest quality materials, we aim to deliver vehicles that will meet the expectations of even the most demanding travel enthusiasts. Our products are the result of over 35 years production experience of special vehicles.

35 YEARS OF EXPERIENCE

0% WOOD TECHNOLOGY

Entire construction of this motorhome is made by plastic and aluminium. It is resistant to all weather conditions, including hail, rain, scratches and UV radiation. We are one of the few manufacturers that make all the basic elements without using wood.
